# How to add the Schala shortcut to your iPhone homescreen

Tap on Safari and go to Schala.golf which is the current login page. Click on the 'Share' icon

When done, slide the screen up until you see the Add to Homescreen link and tap it.

Then tap on Add at the top of the screen.

The Schala icon should now be there to take you directly to the login screen which will auto open with face ID if you have it.
